About Us

Avcıoğlu Şemsiye, which started its commercial life in 2005 by trading umbrellas in Tahtakale, completed all the infrastructure work required for production by 2015 and started production.

Avcıoğlu Şemsiye, which first started rain umbrella production by establishing the necessary machinery and production line in an area of 200 m2 in 2015, currently maintains its title as the only domestic rain umbrella manufacturer in Turkey.
As a result of the R&D studies, demands from our customers and positive feedback, in order to increase its production capacity, it moved to a new production facility of 500 m2 in 2022 and added beach and giant umbrellas to its product range.

By 2023, Avcıoğlu Şemsiye, which is the umbrella supplier of most national chain markets in the country, increased its production area to 1000 m2 with the increase in exports.

Having increased its production capacity to 7500 m2 in 2024, Avcıoğlu Şemsiye is the supplier of many international companies, national markets, promotion and agency companies and hotel chains with its investments in digitalization and institutionalization.
