Manual Opening Umbrella with Safety Lock System

Our umbrella features a **manual opening system**. When the pole is lifted upward during opening, the **reverse locking mechanism** is automatically engaged, securely locking the umbrella in the open position.

To provide additional safety, the umbrella is equipped with an **extra safety pin system**. This pin prevents the umbrella from closing unintentionally, even if the main locking mechanism is released.

Thanks to its reinforced structure and durable connection components, this umbrella is designed for **intensive commercial use** and ensures long-lasting, safe operatio
